

Learning Log: Reflect on your skills and expectations

Instructions

You can use this document as a template for the learning log activity: Reflect on your skills and expectations. Type your answers in this document, and save it on your computer or Google Drive.

We recommend that you save every learning log in one folder and include a date in the file name to help you stay organized. Important information like course number, title, and activity name are already included. After you finish your learning log entry, you can come back and reread your responses later to understand how your opinions on different topics may have changed throughout the courses.

To review detailed instructions on how to complete this activity, please return to Coursera: <u>Learning Log:</u> <u>Reflect on your skills and expectations</u>.

Date: <enter date=""></enter>	Course/topic: Course 1: Foundations: Data, Data Everywhere				
	Learning Log: Reflect on your skills and expectations				
Complete the Analytical Skills Table:	Here is the Analytical Skills Table for you to fill in. Put an "X" in the column that you think best describes your current level with each aspect.				
	Analytical Skill	Strength	<u>Developing</u>	Emerging	Comments/ Plans/ Goals
	Curiosity	Х			
	Context		Х		
	Technical mindset	Χ			
	Data Design			X	
	Data Strategy			X	
Reflection:	Write 2-3 sentences (40-60 words) in response to each of the questions below.				
Questions and responses:	 What do you notice about the ratings you gave yourself in each area? How did you rate yourself in the areas that appeal to you most? Having only a curious mind is not only sufficient to solve any problem we have to use that curiosity in the right way to take decisions following defined processes. If you are asked to rate your experience level in these areas again in a week, what do you think the ratings will be, and why do you think that? Of Course the areas in which I am lagging definitely I improved it because i do have more knowledge and way to process it. So in future I will be more interested to see change in the rating for Data Design and Data Strategy. 				

• How do you plan on developing these skills from now on?

I will understand process for each skills and try to apply it imy day to day life so it will definitely make my mind more in that way.
